Ai-Cybersecurity - Simple and Strong...

BlueDome.Ai

Ai-Driven ZERO TRUST Malware Detection & Remediation Technology

"BLUEDOME.Ai" is VIBRANIUM's Revolutionary innovation in the cybersecurity world, designed to prevent AI-generated malware attacks.

The threat landscape in the cyber world is unpredictable and constantly evolving, filled with complexity. BLUEDOME.Ai is a game-changing innovation by VIBRANIUM that overcomes the limitations of traditional signature-based and behavior-based malware detection algorithms.

By integrating Artificial Intelligence, Machine Learning, and Data Science, BLUEDOME.Ai has transformed VIBRANIUM into a "Modern Antivirus." It can detect, neutralize, and remediate unknown malware by analysing over 800+ million malware samples, patterns, and behaviours.

KEY FEATURES

Scan
High Speed & Precise on Demand virus and malware scans.

Phishing Protection
Advanced phishing protection safeguards your personal and financial information by detecting and blocking fraudulent websites and emails, keeping your online identity secure.

Privacy Protection
"Comprehensive privacy protection shields your sensitive information from prying eyes and unauthorized access, preserving your online confidentiality and peace of mind."

File Encryption
File encryption transforms data into a secure, unreadable format, accessible only with the correct key, ensuring data privacy and protection against unauthorized access.

Auto Update
Continuous Protection Against New and Emerging Threats with Real-Time Updates and Minimal Resource Usage.

Autorun Scanner
Proactively detects and blocks potentially harmful programs from automatically executing upon device connection, safeguarding your system from malware infections.

Data Backup (Data Knox)
Military-grade encrypted smart incremental data backup automates secure data protection by intelligently backing up only modified data, ensuring optimal storage efficiency.

USB DLP
Enhanced Data Leakage Prevention System featuring USB Drive Vaccination and Whitelisting for USB Devices.

Anti Ransomware
Powerful anti-ransomware technology Protect your files and data against unauthorized encryption attempts, ensuring your digital assets remain safe and accessible.

Offline Activation
In the absence of an internet connection, activate Vibranium protection via text SMS for uninterrupted security.

Registry Scan
Scan and fix suspicious or malicious entries in Windows system registry.

Compressed File Scan
Scan to detect and remove malware, viruses, and remove threats from ZIP, RAR, and 7z files.

AUTOMATED & ENCRYPTED "Tally Data Backup" to Protect against Ransomware Attacks
